

SDS-PAGE gel image showing molecular weight markers and two sample lanes. The markers on the left are labeled with their molecular weights in kDa: 200, 116, 97.4, 66.3, 55.4, 36.5, 31.0, 21.5, 14.4, and 6.0. Lane 1 shows a prominent band at approximately 31.0 kDa and a very strong, dark band at approximately 21.5 kDa. Lane 2 shows a prominent band at approximately 31.0 kDa and a very strong, dark band at approximately 21.5 kDa.
